

Job Description: Project Engineer/Senior Site Engineer (Resort Experience is Must)

Company: SmartAgro

Location: Hindupur

Position Type: Full Time

About Us:

SmartAgro is an innovative agro-realty company specializing in high-end timber production while prioritizing ecological integrity. We focus on creating sustainable, high-value agroforestry investments that contribute to a greener future.

Key Responsibilities:

1. **Swimming Pool Development:**
 - Hands-on experience in designing and managing the construction of full-scale swimming pools, focusing on water management, safety, and design that fits luxury environments.
2. **Affordable Labor Shed:**
 - Proven skills in creating cost-effective labor sheds that meet safety regulations while providing comfortable and efficient worker accommodations.
3. **Water Tank and Stand:**
 - Direct experience in engineering and setting up large-capacity water tanks and durable stands for agricultural and residential purposes.
4. **Landscape Activities of Resort:**
 - Solid background in resort landscaping, covering soil preparation, plant selection, and maintenance for sustainability.
5. **Wood Fire Hob:**
 - Experienced in crafting custom wood fire hobs for cooking, blending traditional and modern techniques to improve the culinary experience in natural settings.
6. **Complete Resort Activities:**
 - Extensive experience overseeing the entire development of resorts, from initial planning through construction to operational facility integration.
7. **Villa Development with Interlock Earth Blocks:**
 - Expertise in building sustainable villas using interlock earth blocks, focusing on eco-friendly materials and energy efficiency.
8. **Tree House and Gazebo Plans:**
 - Creative experience in designing and constructing unique tree houses and gazebos that integrate seamlessly with natural surroundings.
9. **Sustainable Buildings:**
 - In-depth knowledge in developing sustainable buildings, emphasizing green standards and innovative technologies to reduce environmental impact.
10. **Topographical and Boundary Details:**

- Skilled in detailed topographical analysis and precise boundary setting essential for accurate planning and legal compliance in large-scale projects.

Additional Responsibilities:

- Able to manage diverse aspects of the **resort**, including villas, tree houses, a natural pool, and essential utility areas, aligning each with sustainability and project goals.
- Experience in integrating agricultural features like a domestic animal farm and a large-scale dairy to boost guest interaction and support resort self-sufficiency.
- Demonstrated ability to accelerate construction timelines effectively, completing projects ahead of schedule without compromising on budget or quality standards.

Qualifications:

- Proven experience with 5 to 10 Years as a Senior Site Engineer or in a similar role.
- A bachelor's degree in civil engineering or related field
- Experience with Microsoft Office Suite, GIS, AutoCAD and other software.
- Excellent interpersonal, leadership and management skills.
- Knowledge of sustainable construction practices and Earth Block Construction.
- Understanding of budgeting and cost control
